

# SimOne

## Overview

SimOne is a Web-based whiteboarding and messaging tool. All those involved in a chatroom can draw, chat, and talk together using prebuilt components.

The whiteboard lets multiple people draw in real time using lines, boxes, and text.

**OVERVIEW INWORK**

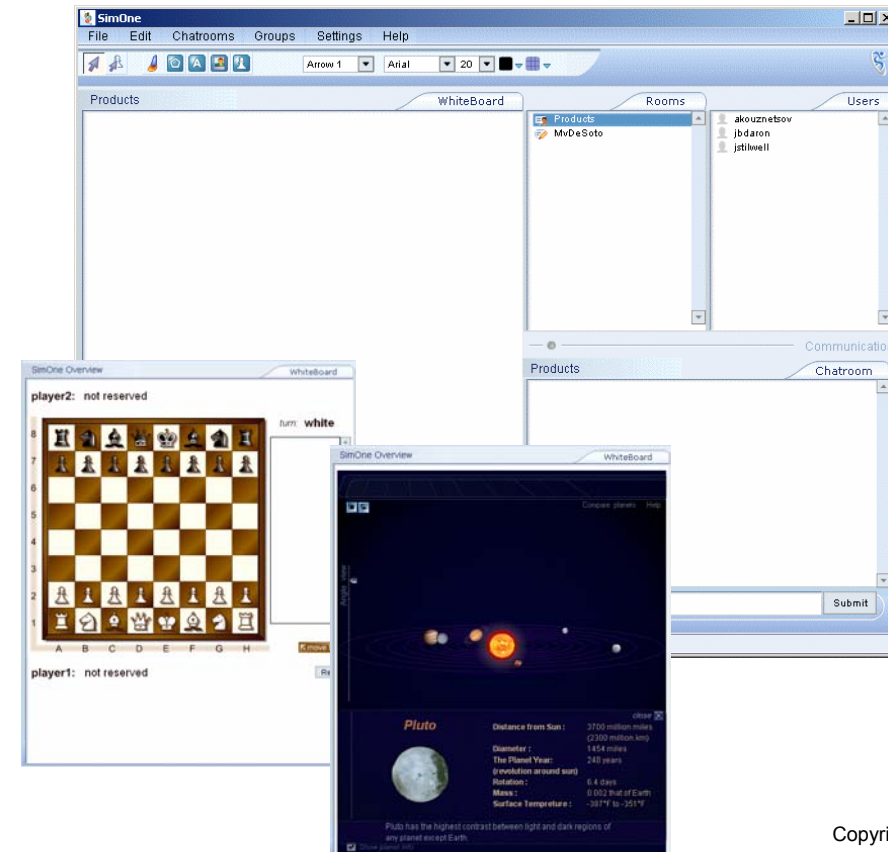

## Features

### Chatrooms

- ✦ Use groups created with SimGroups or create, modify, and delete groups of users directly from SimOne.
- ✦ Create a chatroom where you can chat with all members of a group.
- ✦ Send private messages to any member of a group.
- ✦ Collaborate with others by sharing a chatroom with any or all of your groups.
- ✦ Participate in simultaneous collaboration sessions by creating multiple chatrooms.

### Graphics

- ✦ Use the drawing tools to create drawings and share them in real-time.
- ✦ Insert image files, such as maps and pictures.
- ✦ Create shapes using the shapes menu.
- ✦ Draw in freehand form
- ✦ Set line recognition options for drawing freeform lines, straight lines, or snap-to-shape lines.
- ✦ Manipulate objects on the whiteboard by clicking, dragging, and dropping information with the mouse.
- ✦ Apply different colors to drawing elements and text and create custom colors using the color palette.

### Instant Messaging

- ✦ Send and receive instant messages to any user within any group in your chatrooms.
- ✦ Send a private message to any user within a group.

### Education

- ✦ Learn the basics about the solar system by adding it to the whiteboard.
- ✦ Compare facts about each planet.
- ✦ View different angles of the planets rotating around the sun.

### Games

- ✦ Play chess with a user within one of your groups.

### Technical Requirements – Software

- Internet connection
- Internet browser
- Macromedia Flash version 4 or higher
- SimDesk account
